Education

University of Texas at Dallas
B.S Computer Science

May 2018

Experience

Verizon

June 2017 - December 2017

Software Development Intern

- Worked with a product development team to create facial recognition models to classify different celebrities, gestures, etc.
- Created web-crawling and automation scripts in Python
- Integrated Flickr API into a Ruby script, allowing efficient retrieval of images to build datasets
- Attended weekly teleconferences and scrum meetings, gaining insight on newer technologies and their applications

Projects

Pantomime

HackDFW 2016

- Created a web-based developer tool for gesture creation using Tensorflow, Node.js and MongoDB
- Implemented changes to web API to make more user-friendly

Dramastocks

HackTX 2015

- Created a web application to provide stock suggestions based on Twitter activity using Flask and MongoDB
- Won the MongoDB award

Skills

Languages: Java, Python, Swift, C#, Ruby, Javascript, HTML/CSS

Technologies: Flask, Docker, Git, MySQL, Unity, Atlassian, MongoDB, Node.js

Activities

Dancing for a Cause ♦ HackersUTD ♦ Association of Computing & Machinery
